# Cleaner Production Challenge Workshop

May 15<sup>th</sup>, 2002  
Shoreline Center  
18560 1<sup>st</sup> Avenue NE  
Shoreline, WA 98155  
(206) 341-4243

## Cleaner Production Challenge

The Cleaner Production Challenge (CPC) is a non-enforcement project designed to help metal finishing companies like yours improve their environmental performance through pollution prevention. The Challenge will train groups of employees that can serve as "trainers" to motivate others and promote cleaner processes throughout the operation.

The three main topics of this workshop are Dragout Reduction, Rinsing Techniques, and Bath Maintenance. The workshop will also contain some regulatory updates. You will receive a toolkit to help your company develop its own waste minimization strategy.

Pollution Prevention Planners can get a head start on their Plans by identifying the Pollution Prevention opportunities that will help reduce the amount of wastewater and dangerous sludge you generate.

A Vendor Workshop is scheduled for the afternoon with presentations on different technologies discussed in the morning session. The day will conclude with a networking session where you can talk to different vendors to help you determine which strategy will work best for your company.

### Location and Directions

The Workshop will be held at the Shoreline Center located 20 minutes north of Seattle. \*Park on the north end by the tennis courts.

**From I-5 North:** Take Exit #176 (NE 175<sup>th</sup> St.)

**From I-5 South:** Take exit #177 (NE 205<sup>th</sup> St. Lake Forest Park). Go west at the exit.

For detailed directions, go to:
